linkedin.com/in/fabiogaliano

Software engineer with 5+ years of TypeScript experience, including 3.5 years on Mercedes me at Mercedes-Benz.io. Built operations, booking and payment systems for two Lisbon tour operators.

EXPERIENCE

Independent Product Engineer — Freelance

Nov 2024 – present

Owned Tourflow end to end, from product design to production.

Tourflow — tourflow.pt

- Built a PWA that both operators use to run their daily operations, with driver scheduling, trip logs, automated commissions and settlements, Stripe payments and a partner portal.

  React · TanStack Router / Query · PocketBase / SQLite · Stripe · Docker

Tour websites & booking

- Developed lisbonvintagetours.com and rebuilt mazetours.com from its existing design. Created a custom booking flow for Lisbon Vintage Tours using Cal.com, then introduced my own open-source booking engine, Reserva, on both sites.
- After launch, daily bookings at Lisbon Vintage Tours rose 2.6×. Maze Tours received 10 bookings in the first two months, compared with 2 in the previous years.

  Astro · TypeScript · Tailwind · Cloudflare Workers / D1 · Stripe

Career break

Feb – Aug 2024

Mercedes-Benz.io — Frontend Developer · Lisbon

Jul 2020 – Jan 2024

Worked in a team of 10–12 on Mercedes me account and vehicle features, delivered as Vue web components on the global Mercedes-Benz site.

- Implemented vehicle, profile, settings and payment-method management features in the micro-frontends that replaced the legacy Angular portal.
- Owned translation tooling and GA4 event tracking across the components.
- Contributed to the Vue 2 → 3 and Redux → Pinia migrations and a shared component library while continuing to ship features.
- Intern from Jul 2020, Frontend Developer from Oct 2020.

  Vue 2/3 · TypeScript · Redux → Pinia · Web Components · Jest · GitHub Actions

SELECTED PROJECTS

Reserva — open-source booking engine

Jul 2026 – present

- Developed an open-source booking engine for Astro, with capacity-based availability, Stripe Checkout and an operator dashboard.

  TypeScript · Astro · Cloudflare Workers + D1 · Stripe · github.com/fabiogaliano/reserva

hearted.music — open-source music discovery

Sep 2024 – present

- Organizes Spotify libraries into playlists using LLM-generated song profiles, embeddings and audio features. Evaluated prompts using LLM judges, pairwise comparisons and statistical significance tests.

  React · TanStack Start · Bun · Postgres + pgvector · Vercel AI SDK · github.com/fabiogaliano/hearted.music

SKILLS

Frontend	TypeScript, React 19, Vue 2/3, TanStack Router / Start / Query, Astro, Tailwind, Vite, PWA
Backend	Node, Bun, Hono, Postgres + pgvector, SQLite, PocketBase, Stripe, Better Auth
Infra & testing	Cloudflare (Workers, Pages, D1), Docker, GitHub Actions, Sentry, PostHog, Vitest, Playwright
AI	Vercel AI SDK, embeddings, LLM evaluations, AI-assisted development with tests and review
Spoken	Portuguese (native), English (C2)

EDUCATION

BSc Computer Engineering · Universidade Autónoma de Lisboa · exchange semester at AGH University, Kraków
